

## Rhododendron 'Nova Zembla'

|                             |                                               |
|-----------------------------|-----------------------------------------------|
| <b>Høyde</b>                | 2,5 - 4 m                                     |
| <b>Bredde</b>               | 2,5-4m                                        |
| <b>Krone</b>                | round/spherical, dark, dense crown            |
| <b>Blad</b>                 | green, evergreen                              |
| <b>Blomster</b>             | flowers in May                                |
| <b>Torner</b>               | Ingen                                         |
| <b>Giftighet</b>            | har giftige komponenter                       |
| <b>Jordtype</b>             | loamy soil, sandy soil, peaty soil, acid soil |
| <b>Belegning</b>            | tåler delvis belegning                        |
| <b>Vinterherdighetssone</b> | 5b (-26,0 til -23,4 °C)                       |
| <b>Andre motstander</b>     | motstandsdyktig mot frost (WH 1 - 6)          |
| <b>Anvendelse</b>           | tretønner, tak hager, terrassehager           |
| <b>Form</b>                 | store blomstrende hybrider                    |

This rhododendron has a quite loose, but wide and upright habit. The flowers are deep red with an almost black macula. This is one of the best red-flowering cultivars, very hardy.
